SENIOR TECHNICAL PROGRAM MANAGER

Enterprise Software Delivery | AI Enablement | Cloud Transformation | DevOps | Site Reliability Engineering | Enterprise Implementations

Senior Technical Program Manager with 15+ years of experience leading enterprise software implementations, cloud transformation initiatives, AI enablement, and production-critical delivery across Fortune 500 organizations including IBM, Equifax, HP, and Optiva.

Experienced leading end-to-end technical programs from discovery and solution planning through implementation, production deployment, and operational transition while partnering with engineering, product, QA, operations, architects, and executive stakeholders.

Combines technical program leadership with hands-on expertise in cloud platforms, APIs, automation, DevOps, Site Reliability Engineering, and enterprise software delivery. Recognized for improving delivery execution through automation, executive reporting, operational excellence, and engineering enablement.

In addition to enterprise delivery leadership, has delivered more than **3,000 hours of instructor-led technical training** for global engineering organizations across AMER, EMEA, and APAC, helping teams strengthen capabilities in cloud platforms, observability, enterprise middleware, and production operations.

SELECTED CAREER IMPACT

- 15+ years leading enterprise technology initiatives across Fortune 500 organizations.
- Reduced manual reporting effort by 80% through Python and API-driven automation.
- Improved MTTR by 30% through structured incident management and operational governance.
- Reduced failed deployments by 35% through CI/CD modernization and release improvements.
- Delivered 3,000+ hours of enterprise technical training across global engineering organizations.
- Supported engineering teams across AMER, EMEA, and APAC.

CORE COMPETENCIES

- Technical Project Management
- Enterprise Software Implementations
- Enterprise Delivery & Release Management
- Cloud Transformation
- AI & Automation Enablement
- Executive Stakeholder Management
- Technical Discovery & Solution Scoping
- Portfolio & Delivery Governance
- Cross-Functional Leadership
- APIs & Enterprise Integrations
- Site Reliability Engineering (SRE)
- DevOps & CI/CD
- Incident & Problem Management
- Risk & Dependency Management
- Executive Reporting & Dashboards
- Agile Delivery (Scrum, Kanban, SAFe)
- Customer-Facing Technical Deliver

PROFESSIONAL EXPERIENCE

iTree Training

Senior Technical Program Manager / Product Owner | 2024 - Present

Lead enterprise technical delivery, engineering operations, and automation initiatives supporting cloud-native platforms and enterprise software implementations.

Key Achievements

- Led end-to-end delivery of technical initiatives from planning through production deployment across engineering, QA, and operations.
- Coordinated cross-functional teams to deliver production-ready implementations while managing risks, timelines, milestones and dependencies.
- Designed enterprise incident management workflows covering detection, escalation, communication, root cause analysis, and post-mortem reviews.
- Built Python and Jira API automation reducing manual reporting effort by **80%**, saving over **40 hours per month** of operational work
- Developed executive dashboards tracking delivery health, MTTR, recurring issues, and operational performance.
- Standardized delivery reporting across teams, improving milestone visibility from **70% to 90%**.

IBM

Site Reliability Engineer | 2021 - 2024

Supported enterprise cloud platforms. Responsible for operational reliability, production support, automation, and enterprise software delivery.

Key Achievements

- Coordinated high-severity production incidents across global engineering organizations, improving MTTR by 30%.
- Implemented observability solutions using Datadog, Prometheus, ELK, and cloud-native monitoring platforms, improving incident detection by 40%.
- Automated operational workflows using Python/REST APIs, reducing manual operational effort by 70%.
- Led recurring incident analysis and root cause reviews, reducing repeat incidents by 25%.
- Supported production deployments, release validation, and operational readiness activities.

Optiva

Scrum Master / Engineering Project Manager | 2019 - 2021

Managed enterprise software delivery for highly available telecommunications platforms supporting distributed engineering organizations.

Key Achievements

- Managed multiple concurrent engineering initiatives across globally distributed teams.
- Coordinated engineering, QA, and operations throughout software implementation lifecycles.
- Improved sprint predictability from 65% to 85% by integrating operational risk management into delivery planning.
- Led executive communications during production incidents and delivery reviews.
- Facilitated Agile continuous improvement initiatives that enhanced engineering execution.

Equifax

Engineering Project Manager | 2015 - 2019

Led cloud modernization, automation, CI/CD transformation, and enterprise platform improvement initiatives.

Key Achievements

- Managed enterprise cloud modernization and deployment transformation programs.
- Built API automation using Python, JavaScript, SQL, and Jira APIs, reducing reporting effort by 80%.
- Developed executive reporting platforms improving visibility into delivery performance.
- Improved release consistency by 25% while reducing failed deployments by 35%.
- Supported chatbot and AI-enabled automation initiatives improving engineering productivity.

Technical Project Manager | 2012 - 2015

Managed enterprise infrastructure modernization and platform implementation projects

Key Achievements

- Delivered infrastructure modernization initiatives supporting mission-critical enterprise systems.
- Improved delivery predictability through Agile implementation, increasing on-time delivery from 65% to 85%.
- Automated operational reporting reducing manual effort by 60%.
- Coordinated engineering teams through planning, deployment, and production transition.

Technical Support Team Lead | 2010 - 2012

- Led enterprise technical support operations in a 24/7 production environment.
- Managed incident escalations and customer-impacting technical issues.
- Improved operational reporting and workflow efficiency through automation.
- Reduced ticket resolution time by 25%.

HP

Technical Support Engineer | 2008 - 2010

Provided enterprise application support, troubleshooting, production operations, and issue resolution for global customers.

ENTERPRISE TECHNICAL INSTRUCTION

Global Technical Instructor (Contract)

Enterprise Engineering Trainer | 2021 – Present

Deliver enterprise technical training on behalf of LearnQuest and Netec for global engineering organizations supporting clients including IBM and Walmart.

Key Achievements

- Delivered 3,000+ hours of instructor-led enterprise technical training across AMER, EMEA, and APAC.
- Conducted 300+ virtual technical training sessions covering Site Reliability Engineering, observability, IBM MQ, Db2, cloud platforms, and enterprise integration technologies.
- Designed hands-on labs simulating production environments, deployments, incidents, and troubleshooting scenarios.
- Trained engineering and operations teams on incident management, reliability engineering, observability, and production support best practices.
- Developed structured technical curriculum supporting enterprise engineering enablement and operational readiness.

EDUCATION

- **Master of Project Management** - Master Cum Laude, Spain
- **Master of Business Administration** (**MBA**) - Master Cum Laude, Spain
- **Bachelor of Computer Science** - ULACIT, Costa Rica

CERTIFICATIONS

- PMI Agile Certified Practitioner (PMI-ACP)
- Certified ScrumMaster (CSM)
- Scrum Product Owner Certified (SPOC)
- SAFe Practitioner
- AWS Certified Cloud Practitioner

TECHNICAL SKILLS

- **Technical Program & Delivery**: Jira | Jira Cloud | Jira Server | Jira Data Center | Jira Align | Confluence | Advanced Roadmaps | Jira Automation | Jira REST APIs | ScriptRunner | Tempo Timesheets
- **Cloud & Infrastructure**: AWS | Microsoft Azure | Google Cloud Platform (GCP) | IBM Cloud | Docker | Kubernetes | Terraform
- **Programming & Automation**: Python | Java | JavaScript | Groovy | Node.js | Shell Scripting | SQL | REST APIs
- **Databases**: Oracle | PostgreSQL | SQL Server | MySQL
- **CI/CD & Source Control**: GitHub | GitLab | Bitbucket | Jenkins | CI/CD Pipelines | Fisheye | Crowd
- **Monitoring & Observability**: Datadog | Prometheus | Grafana | ELK Stack | Dynatrace | New Relic | Instana | Amazon CloudWatch | Azure Monitor | Google Cloud Operations
- **Incident & Service Management**: PagerDuty | ServiceNow | Zendesk
- **Testing & APIs**: Postman | Selenium | JUnit
- **Data & Analytics**: Databricks | Looker
- **Artificial Intelligence**: ChatGPT | Azure OpenAI | GitHub Copilot | Amazon CodeWhisperer | Atlassian Rovo
- **Collaboration & Productivity**: Slack | Microsoft Teams | Zoom | Cisco Webex | Google Workspace | Microsoft 365 | Workday | Asana | Trello | Coda | Monday.com
- **Operating Systems**: Linux | Unix | Windows | Windows Server | macOS
